

Rugar Woods Nature Trail

STATE UNIVERSITY OF NEW YORK
PLATTSBURGH

In the heart of the City of Plattsburgh and adjacent to the meandering Saranac River lies Rugar Woods, a forested tract that provides educational and recreational engagement opportunities.

Rugar Woods Nature Trail will guide you along an approximately one mile interactive loop that offers learning opportunities about the ecology of local flora and fauna.

All interpretive signs contain a QR code, that when scanned on a mobile device, will provide you with supplemental information on the ecological concept or species depicted.

The Rugar Woods Nature Trail is a spur trail of the Saranac River Trail, which aims to connect communities along the Saranac River in recreational, cultural, and ecologically meaningful ways.

"Your Green Fee at Work"
Trail funded in part by the Campus Committee for Environmental Responsibility.
